

Rating Scales: A-E and 1-3

A--programs that overlap with our active offerings

B--programs that overlap with any dormant or on-hold offerings

C--programs that overlap with programs we have imagined getting into in the future

D--programs where we don't imagine a program of our own but have faculty or courses

E --programs we don't have or aspire to get and we don't have enough expertise to join i

In cases where they are anticipating offering only courses or internships:

1—Competitive with something we do.

2—Potential for collaboration.

3—Go ahead, not a problem for us.

Activities expected to begin in Fall 2019

Historic Preservation (concentration in M.Des.)	A
Arts Management & Film Studies internship Cohort	2
Certificate in Health Data Science	D
Public Health (MS)	C
Clinical Epidemiology Executive (MS/MPH)	

Comments

There are some areas of “soft-skills” training CAPS currently offers

We have a biotechnology track in our Bio MS
(Somewhat A; we have a PhD in Chemistry with a Biochemistry Track, and a PhD in Integrative Biosciences where we’ve been trying to get an MS)

We have a dormant grad certificate in GIS as well as a concentration at the undergrad level

Our MS in Urban Planning and Community Development offers courses in this area and planned to add a concentration now that we have cadre of plai

We may have internships from LAIS and maybe we should be looking into integrating our major into a 4+1 with them
Duplicates existing program

Don't know what this is. Presumably #3.

Comments

Duplicates existing program

Without a curriculum I cannot tell if there is overlap with our Public History or Archives programs (more likely the former), but since the potential is there I am listing it.

We have internships in Cinema Studies and this is expected to grow in the future.

We have a couple of CS faculty members active in this field

As you know we have a pending proposal for an MPH that the new Dean of Nursing and SFE faculty are deep into in retro-fitting to more appropriately

ners. We are actively engaged in transportation planning in Boston (program and research) and in sustainable transit planning (ecological design, res

shift from solely health disparities. We offer a number of courses in this area as well and would like to see UMB's leadership in this area sustained an

research and academic) and have very strong collaborations with MASSDOT (as you know 2 of our folks won a national award in this area), TPL and other

id not interferred with.

rs. Our civil engineers and our planners are deep in this area and it would be a significant blow to them if cut off at the knees given our strong connect

itions in the region)
